The Massachusetts Economy: The Return of Growth

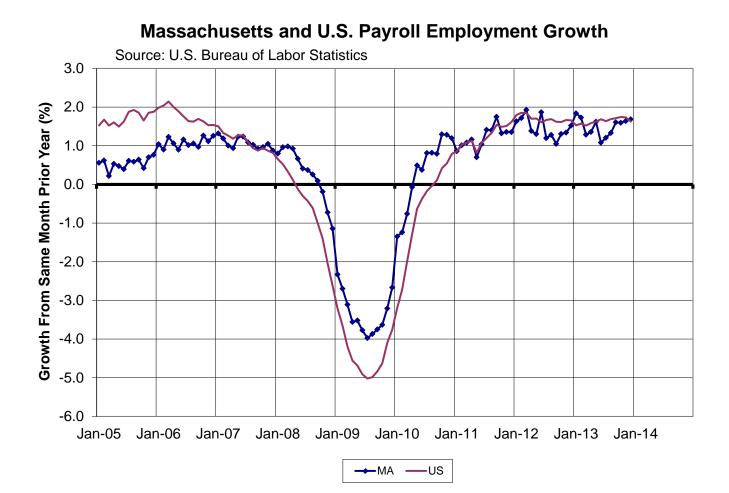

Presentation to MassEcon January 24, 2014

Alan Clayton-Matthews School of Public Policy and Urban Affairs Northeastern University NEEP, MassBenchmarks

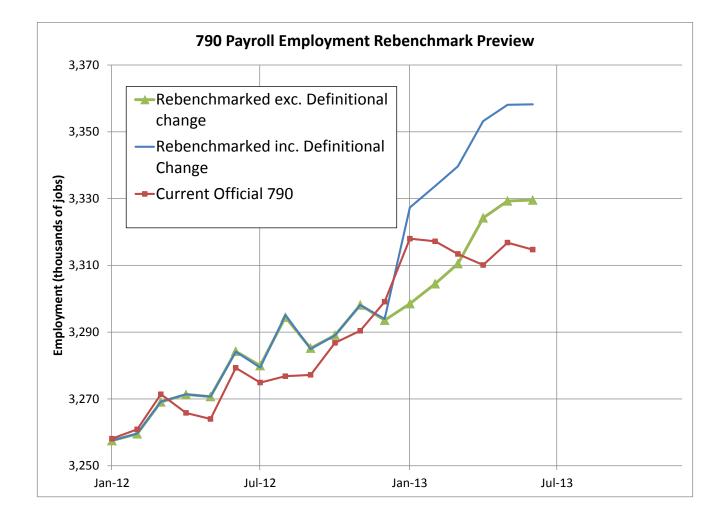

Pre-preliminary estimate of 4th quarter GDP (not adjusted for productivity)

Moderate job growth is gaining momentum

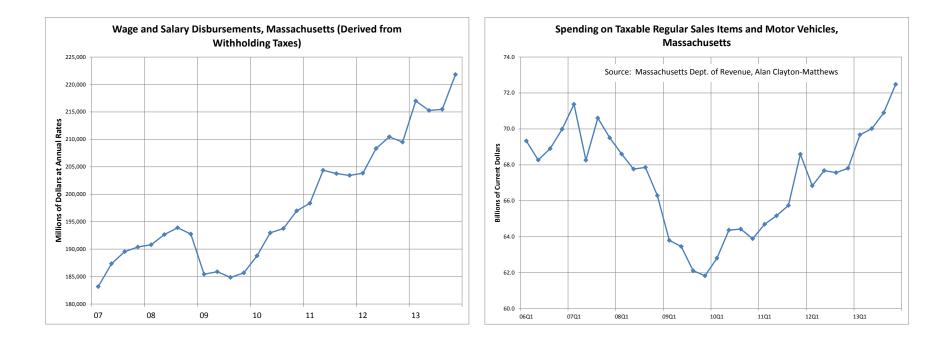

Job growth in the first half of 2013 was smoother and a bit better than the CES-790 estimates.

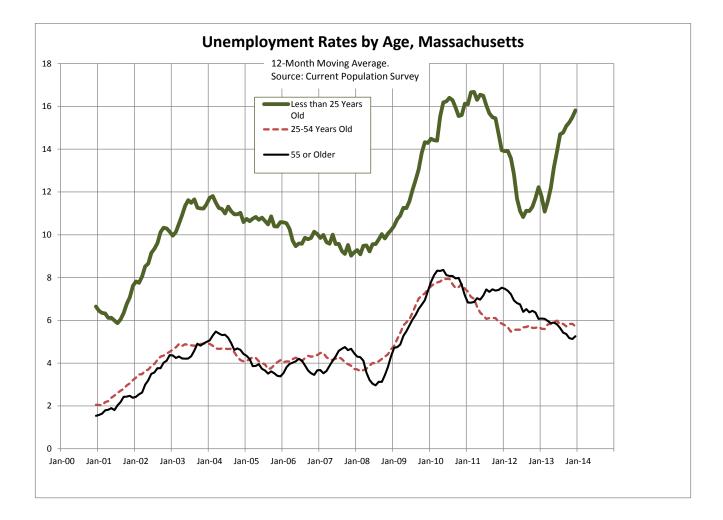

Massachusetts earnings and spending are growing well.

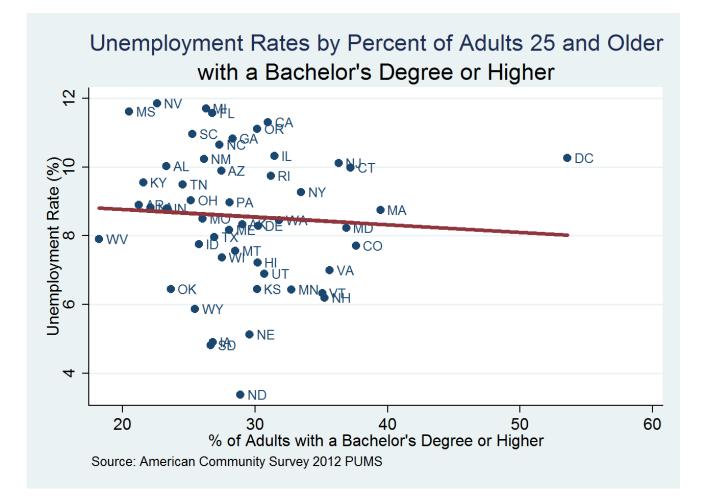

Wage and salary income. 4th Quarter: 12.3%, Year: 5.9% Spending on taxable sales tax goods. 4th Quarter: 9.2%, Year: 6.9%

But unemployment is still a big problem.

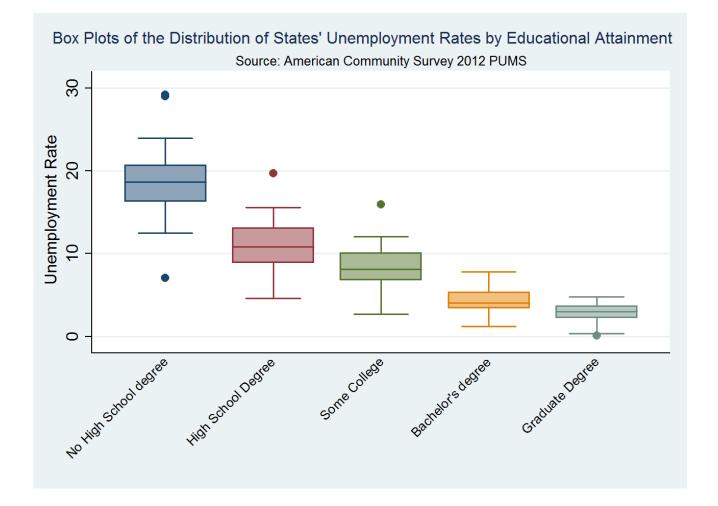

Education explains very little of the variation in unemployment rates across states.

But is critical for job success for individuals.

Employment opportunities for those with low levels of education vary enormously by state.

Expansion – finally, to solidify in 2014.

Where the jobs will be.
